DETAILED ACTION

Allowable Subject Matter

1. **Claims 8-15** are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding **claim 8**, The present application teaches a radio module which is operated in two mode of operation wherein an electrical assignment of the plurality of connection pins is reconfigurable such that the internal microprocessor device uses at least one of the plurality of connection pins both for the passive mode of operation and for one of the active modes of operations wherein the number of pins are reduced by utilizing one or more reconfigurable pins, where each pin operates in both a passive mode of operation and an active modes of operation as specifically mentioned in claim 8.

The closest such as Liou et al. (US Publication 2003/0207703) teaches a headset which is provided with a connector for connecting the headset to a U.S.B port through a cable of another apparatus such as a personal computer to function as wireless data link. The connector is disclosed as a port in the headset housing, or alternatively as a plug to connect the device directly to the U.S.B. port of the computer. Liou connector is not reconfigurable, the disclosure teaches the connector as a straight forward U.S.B. cable that utilizes only a passive mode. Furthermore, Liou fails to teach the specific pin configuration, and does not disclose a specific pin being reconfigurable in a passive and active mode of operation, and the use of AT commands for actuating the radio module as specifically mention on claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
